## Summary

As an adept Front End Developer specializing in HTML and CSS, with proficiency in JavaScript, PHP, and Java, I bring a wealth of experience in crafting captivating digital experiences. With a meticulous eye for detail and a commitment to excellence, I excel in designing and implementing intuitive user interfaces that elevate brand presence and engagement. My strong foundation in object-oriented programming enables me to deliver efficient and scalable solutions tailored to meet diverse project requirements. Committed to staying abreast of industry advancements, I continuously refine my skills to remain at the forefront of web development trends.

## Projects

### MEME GENERATOR:

The Meme Generator project is an interactive web application designed to allow users to create custom memes easily. Leveraging the power of HTML, CSS, and JavaScript, this project provides a simple yet intuitive interface for users to generate memes on the fly.

### Online Book Store (ongoing):

The Online Book Store project is an e-commerce platform designed to provide users with a seamless experience for browsing, purchasing, and managing books online. Leveraging technologies such as HTML, CSS, JavaScript, PHP, and MySQL, this project features a user-friendly interface with functionalities including user authentication, book categorization, search functionality, shopping cart management, and secure payment processing. The project aims to deliver a comprehensive solution for book enthusiasts to explore and purchase their favorite titles conveniently from the comfort of their homes.
